NOTE: (*) IMF Forecasts (October 2023).

- a Percentage of population with income of less than \$3.65 (purchasing power parity in 2017 dollars) per day.
 b Drawing on the IMF's calculations for assessing reserve adequacy, which take into account the level of reserves relative to different aggregates and the related

- prawing on the IMP's calculations for assessing reserve adequacy, which take into account the level of reserves relative to different aggregates and the related opportunity cost.

 Sum of bank claims on all sectors as a percentage of GDP.

 Difference between the actual level and the trend in credit to the private sector as a percentage of GDP.

 Return on Assets (ROA) is defined as profit as a percentage of banking sector assets.

 Return on Equity (ROE) is defined as profit as a percentage of banking sector capital.

 Defined as the ratio of net income from financial intermediation to operating income. Provisioning expenses are not included in the numerator. Operating income comprises income from financial intermediation, income from services, income from shares and other operating income/expenditure, except for administration expenses.

"Measuring geopolitical risk". *American Economic Review, April*, 112(4), pp. 1194-1225; and Corinna Ghirelli, Javier J. Pérez and Alberto Urtasun. (2021). "The spillover effects of economic policy uncertainty in Latin America on the Spanish economy". *Latin American Journal of Central Banking*, 2(2); and Erik Andres-Escayola, Corinna Ghirelli, Luis Molina, Javier J. Pérez and Elena Vidal. (2022). "Using newspapers for textual indicators: which and how many?". Documentos de Trabajo, 2235, Banco de España. https://www.bde.es/f/webbde/SES/Secciones/Publicaciones/PublicacionesSeriadas/DocumentosTrabajo/22/Files/dt2235e.pdf.

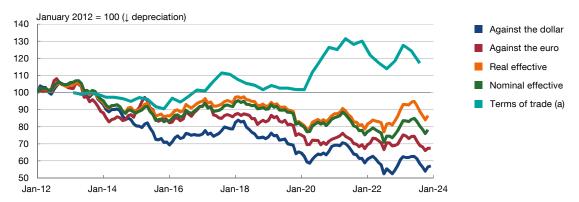

- a The Economic Policy Uncertainty (EPU) index is constructed drawing on the local and international press using words related to uncertainty over economic policies, based on the following methodology: Scott R. Baker, Nicholas Bloom and Steven J. Davis. (2016). "Measuring economic policy uncertainty". Quarterly Journal of Economics, 131(4), pp. 1593-1636.
- b The Geopolitical Risk (GPR) Index is a measure of adverse geopolitical events based on a survey of newspaper articles in the English-speaking press covering geopolitical unrest.
