RESULTS OF NON-FINANCIAL CORPORATIONS TO 2014 Q2

The authors of this article are María Méndez and Álvaro Menéndez, of the Directorate General Economics, Statistics and Research.

Overview¹

The information compiled by the Central Balance Sheet Data Office Quarterly Survey (CBQ) indicates a recovery in business activity in the first half of 2014 which extended the expansionary trend seen in the first three months of the year. Between January and June, the gross value added (GVA) of the total CBQ sample increased by 2.3% in year-on-year terms, compared with a decrease of 3.5% a year earlier.

Personnel costs were practically unchanged, while they fell by 1.9% in the same period of the previous year. This was due to a moderation in job losses, which amounted to 1% in the half as a whole (against a drop of 2.1% a year earlier), and stronger growth in average compensation, which grew by 0.9% (0.2% in the same period of 2013).

Gross operating profit (GOP) increased by 4.7%, in contrast to the decline of 5% in the same half of the previous year. Financial revenue decreased by 3.3% due to the negative influence exerted by the fall in dividends received. Financial costs also fell, albeit very slightly (by 0.4%), as a consequence of the decrease, in year-on-year terms, in corporate debt, offset partially by a slight increase in non-interest costs and in the average cost of debt.

The decrease in liabilities in 2014 to date gave rise to slight declines in the debt ratios E1 (interest-bearing debt/net assets) and E2 (ratio of debt to the sum of gross operating profit and financial revenue), the latter also being influenced by the favourable course of ordinary profit. The interest burden ratio also decreased moderately, owing to the fall in financial costs and the rise in ordinary profit, which forms the denominator of this indicator.

Ordinary net profit (ONP) grew by 7.7%, whereas in the same period of the previous year it contracted by 12.6%. The increase in ordinary profit brought an improvement in profitability levels, in terms of both the ratio relative to net assets, which stood at 4.2%, up 0.4 percentage points (pp) on the first half of 2013, and that relative to equity, up 0.7 pp to 4.8%. This favourable performance was apparent in practically all sectors of activity, with increases in the return on investment ranging from 0.5 pp to 1 pp. Meanwhile, the ratio that measures the average cost of debt remained at 3.5%, so that the difference between the return on investment and this indicator grew further, in this case by 0.3 pp, to stand at 0.7%.

Finally, extraordinary gains (losses) had a highly positive effect on profits for the half, basically because of substantial gains on disposals of investments and significant increases in financial asset valuations, in contrast to the considerable losses recorded in the first half of 2013 due to impairment of assets of this type. As a result, business profits increased significantly, albeit from a historically low level.

In short, the recovery of business activity and the adjustments in balance sheets are giving rise to an improvement in the economic and financial situation of the CBQ sample firms as

¹ This article is based on the data supplied up to 10 September by 774 firms reporting to the Central Balance Sheet Data Office. In terms of GVA, this sample accounts for 14.2% of the whole of the non-financial corporations sector.

a whole. Moreover, the analysis of microdata shows that the improvement in aggregate indicators from mid-2013 is fairly widespread across the sample and seems to be more marked in firms in a comparatively less favourable position (see Box 1).

Activity

In the first half of 2014 the GVA of the corporations reporting to the CBQ increased by 2.3% (see Table 1 and Chart 1), thus extending the expansionary course apparent in the first three months of this year. This figure contrasts with the performance of this variable in the same period a year earlier, when it decreased by 3.5%. The improvement in activity took place against a backdrop of progressive recovery in domestic demand and a steady positive contribution from external activity. Thus, in the firms that make up the CBQ sample, domestic sales grew by 0.6%, compared with a fall of 6.1% a year earlier, and the relative importance of exports continued to rise, reaching 22.1% of their turnover (nearly 1 pp more than the 2013 figure) (see Table 2).

The sectoral breakdown shows that the increase in GVA was fairly widespread, with rises in almost all sectors of activity (see Table 3). The only exception was the information and communication sector, where the 6.6% fall in GVA exceeded even the 3.3% decline in the first half of 2013. In the wholesale and retail trade and accommodation and food service activities sector, GVA grew by 8.1%, in sharp contrast to the 4.3% fall in the same period of the previous year. In industry the increase was 2.4%, as against a decline of 1.3% a year earlier. Analysis of developments in the various industrial sub-sectors reveals a notable dispersion. While some, such as the manufacture of computer, electronic and optical products or the manufacture of transport equipment, posted sharp increases in this item (up 18.6% and 7.5%, respectively), others, such as other manufacturing or the manufacture of mineral and metal products, saw this surplus shrink (by 16.7% and 2.1%, respectively). In the energy sector, GVA increased by 6%, whereas in the first half of 2013 it had fallen by 5.9%. This rise was prompted by the recovery in the electricity, gas and water supply sub-sector, where GVA rose by 5.5%, having fallen by 5% a year earlier. Also contributing to this positive trend was the oil refining sub-sector, where GVA increased by 23.4% (a year earlier it had contracted by 34.8%). Finally, in the group that covers other activities, GVA increased by 1.7%, compared with a decline of 1.8% in 2013, the strongest performance being that of the transport sector.

Chart 2 shows that GVA was more buoyant in every quartile of the distribution, with significant increases in growth rates relative to the levels in the first half of 2013. This suggests that the improvement in activity encompassed most of the firms in this sample, although a high degree of heterogeneity persists in this variable, as seen, for example, in the fact that the interquartile range (the difference between the 75th and 25th percentiles) remained around 30 pp.

Employment and personnel costs

Personnel costs were practically unchanged in the first half of 2014, as compared with a 1.9% fall in the same period a year earlier. This was the result of a decline of 1% in average employment and an increase of 0.9% in average compensation.

The rate of job destruction in the CBQ sample firms continued to decrease, both with respect to the same period of 2013 (2.1%) and in comparison with the whole of the previous year (1.9%). Regarding this statistic, it should be kept in mind that the sample is weighted towards large firms, some of which are adjusting their staffing levels, so this behaviour is not incompatible with the recovery of employment in the economy as a whole. By type of contract, the 1.3% growth in temporary employment (see Table 4) was notable. By contrast, the number of workers with permanent contracts, affected precisely by staff

As noted in the main text of this article, the latest CBQ information identifies an improvement in the profitability and financial position indicators of the sample firms as a whole. This Box analyses the microdata to detect how widespread this improvement is and whether it affects any particular types of firms more strongly than others.

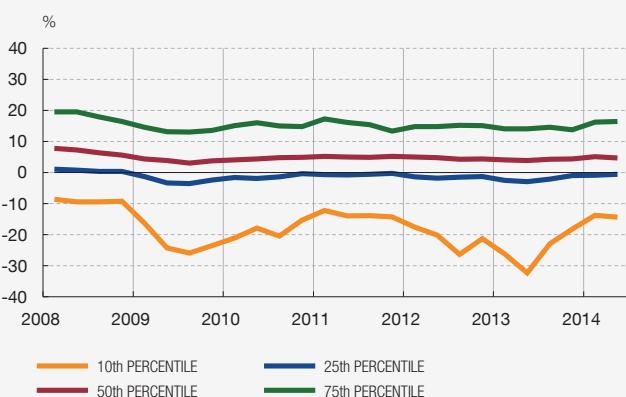

The accompanying charts show the various percentiles of the statistical distribution of four indicators of the profitability and financial position of firms, based on CBQ data for the period from the start of 2008 to mid-2014. The analysis of return on equity in Panel 1 reveals that the recovery in this ratio in recent quarters is detected across the whole of the distribution, although the increase is more marked for the firms at the bottom (i.e. those which are less profitable), which show negative returns during

the whole of the period analysed. Thus the 10th percentile of the distribution of this variable increased by 18.6 pp from mid-2013, whereas the median (which indicates the profitability of a representative firm) increased by 1 pp. In this same vein, Panel 2 shows how the ratio which measures the share of income used to make debt interest payments tended to decrease in this same period across the whole of the distribution. Although rising slightly in 2014 Q2, the 75th percentile showed the sharpest decrease, reflecting a larger fall for firms with a heavier debt burden. These firms, which are ones with the highest debt levels, seem to be benefitting most from the lower interest rates in the recent period.

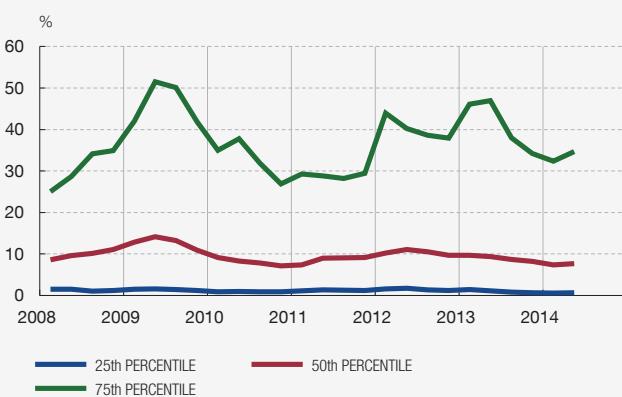

The ratio of interest-bearing debt to net assets (ratio E1) has decreased slightly in recent quarters across the whole of the

DISTRIBUTION OF PROFITABILITY AND FINANCIAL POSITION INDICATORS (a)

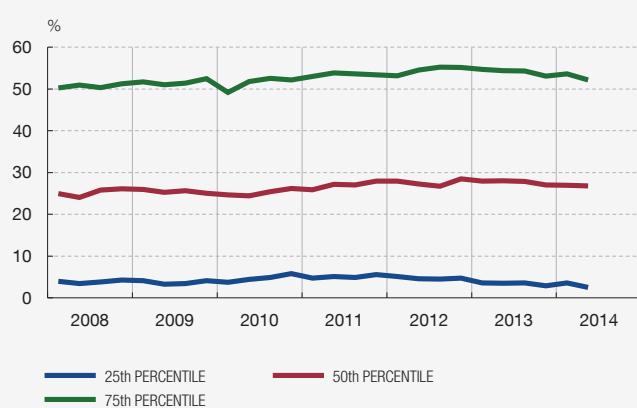

1 RETURN ON EQUITY (b)

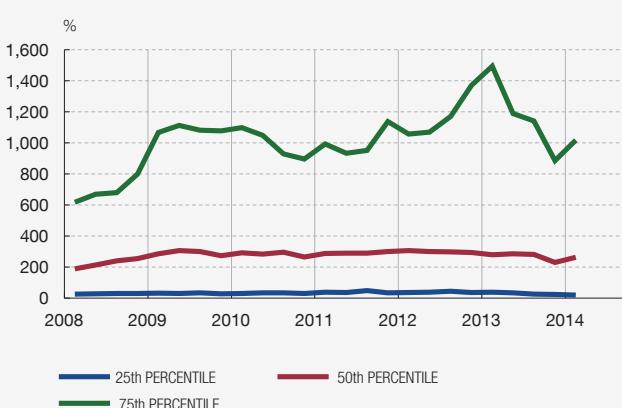

2 DEBT BURDEN (c)

3 DEBT RATIO E1 (d)

4 DEBT RATIO E2 (e)

SOURCE: Banco de España.

- a Variables drawn from the income statement (ONP, GOP, interest on borrowed funds and financial revenue) have been calculated by accumulating the flows of four quarters.
- b Return on equity is calculated as ONP / Average equity.
- c Debt burden is calculated as Interest on borrowed funds / (GOP + Financial revenue).
- d Debt ratio E1 is calculated as Interest-bearing borrowing / Net assets.
- e Debt ratio E2 is calculated as Interest-bearing borrowing / (GOP + Financial revenue).

distribution, and no notable differences in the behaviour of the various percentiles were discernible in this case (see Panel 3). By contrast, the debt ratio E2, shown in Panel 4, which approximates the ability to repay debt from income received, has decreased particularly sharply from mid-2013 for the 25% most highly indebted firms (despite the slight rise in 2014 Q2). The different behaviour of the two measures of indebtedness is due to the greater stability of balance sheet items (particularly firms' total assets) compared with income (the denominator of ratio E2), which shows more marked cyclical behaviour.

The sectoral analysis identifies wholesale and retail trade and, to a lesser extent, industry as the sectors in which firms in a less

favourable financial position are posting a clearer improvement than firms in a sounder financial position. Also, the information and communication sector stands out from the others insofar as it is where the 75th percentile of the distribution of debt ratio E1 has decreased most significantly in recent quarters.

In short, the analysis of CBQ microdata reveals that the improvement in firms' aggregate economic and financial indicators from mid-2013 is widespread, but more marked for those firms which are in a less favourable position (i.e. those with higher debt and debt burden and lower profitability). Hence the dispersion of firms' financial position indicators has decreased, although it continues to be higher than before the crisis.

cuts at some of the aforementioned large firms, continued to decline, the fall of 1.4% being slightly higher than in the same period a year earlier (1.1%). Table 5 shows that in the first half of this year, 52% of firms destroyed jobs, nearly 1.5 pp less than the percentage recorded a year earlier. The sectoral breakdown reveals that in almost all areas the average number of workers continued to fall year-on-year. In some cases, such as in energy and in wholesale & retail trade & accommodation & food service activities, the falls (of 3.4% and 1.6%, respectively) were somewhat sharper than in 2013. Contrastingly, in industry and in information and communication, although falls were recorded (0.3% and 2.9%, respectively), they were more moderate than in the previous year. Finally, the residual sector of other activities was the most expansionary, with a 0.3% increase in the average number of workers, which mainly stemmed from the positive evolution of the other services sub-sector.

Average compensation grew by 0.7 pp more than in the first half of the previous year (0.2%). The sectoral breakdown shows that average wages in energy and in wholesale & retail trade & accommodation & food service activities rose at above-average rates (2.4% and 3.7%, respectively), influenced by the increase in the variable component of such remuneration. By contrast, in industry and in information and communication, personnel costs per worker held on a more moderate growth rate (around 0.5%). Finally, the residual sector of other activities showed a mild decline in average personnel costs (down 0.6%).

Profits, rates of return and debt

The pattern of expansion shown by GVA passed through to GOP, which grew by 4.7% up to June, compared with a decrease of 5% in the same period of the previous year. As in the case of GVA, the improvement was broadly based at the sector level, with the exception of information and communication, in which GOP shrank by 8.6%. Notable among the other sectors were wholesale & retail trade & accommodation & food service activities, in which this surplus increased most strongly (by 20.7%).

The decline of 3.3% in financial revenue was practically half that in the previous year (6.1%). This was a result of the smaller dividend receipts, which were down by 10.1%, partially offset by an increase in interest revenue (13.8%).

SOURCE: Banco de España.

NOTE: In calculating rates, internal accounting movements have been edited out of items 4, 5, 7 and 8.

a All the data in this column have been calculated as the weighted average of the quarterly data.

b NA = Net assets (net of non-interest-bearing borrowing); E = Equity; IBB = Interest-bearing borrowing; NA = E + IBB. The financial costs in the numerators of ratios R.1 and R.2 only include the portion of financial costs that is interest on borrowed funds (5.1) and not other financial costs (5.2).

The first half of 2014 saw a further decrease in corporate debt, continuing the trend prevailing throughout 2013. In line with these developments, there were falls in both the E1 ratio (interest-bearing debt as a proportion of net assets), which at 46.5% was down 0.5 pp from December 2013, and the E2 ratio (debt to ordinary profit), the latter also influenced by the favourable course of profits (the denominator of this indicator). The sectoral breakdown shows that the fall in these ratios affected nearly all sectors of activity, with information and communication being the only one to show slight growth or no change in the first six months of 2014 (see Chart 3).

- c Data for 2014 Q1-Q2 relative to the same period in 2013.

The downward trend in debt contributed to the decline in financial costs, although its effect was partly offset by the slight increase in the average cost of debt and in non-interest expenses (see Table 6). The decrease of 0.4% in financial costs, along with the favourable course of ordinary profit, prompted a further reduction in the debt burden ratio, which dropped to 22.5% with respect to GOP, and in financial revenues (down 0.6 pp from 2013).

Depreciation, impairment and operating provisions were practically unchanged, as compared with an increase of 3.8% a year earlier, when this item was affected by the impact of the account revaluation law.

- b Average of the four quarters of 2013. In the case of the rates, the calculation is made relative to the same period in 2012.
- c Data for 2014 Q1-Q2. In the case of the rates, the calculation is made relative to the same period in 2013.

The developments in operating activities, along with the course of financial costs and revenues and of depreciation, led ordinary net profit to rise by 7.7% in the first half of 2014, compared with a decrease of 12.6% in the same period of the previous year. The growth in ordinary profit brought an increase in profitability levels. Thus the ratio that approximates the return on investment stood at 4.2%, against 3.8% in the same period of 2013, and the ratio that approximates the return on equity rose to 4.8%, up 0.7 pp on a year earlier. These indicators increased in all sectors except information and communication, the only one in which the return on investment decreased, moving down to 15.7%, compared with 20.7% in the previous year (see Table 7). Industry was where this indicator rose most

a All the data in these columns have been calculated as the weighted average of the quarterly data.

strongly (1 pp), moving up to 4.7%. In the other cases, the increases were around 0.5 pp. In line with this improvement in profitability, Table 8 shows that in the first six months of 2014 there was a decrease in the percentage of firms with negative returns. The increase in the average level of returns widened further the gap between this indicator and the average cost of debt, which held at 3.5%, standing at 0.7% for the sample as a whole, up 0.3 pp on the previous year.

Finally, an analysis of extraordinary gains (losses) shows that in the first half of 2014 they exerted a strong positive influence on the growth of net profit. The main reason was that in the first part of this year significant gains and additions were recorded due to increases in the valuation of financial assets. This contrasted with what happened in the first half of 2013, when firms recorded high impairment losses on these assets. The result was that net profit to June grew by 119.1%, although this figure is strongly affected by the still-low starting level. Expressing this surplus as a percentage of GVA, the notable increase of 25.5% in the period analysed exceeded that recorded a year earlier (14.1%).

11.9.2014.

CONTENTS

These economic indicators are permanently updated on the Banco de España website (<http://www.bde.es/homee.htm>). The date on which the indicators whose source is the Banco de España [those indicated with (BE) in this table of contents] are updated is published in a calendar that is disseminated on the Internet (<http://www.bde.es/bde/en/areas/estadis/>).

MAIN MACROECONOMIC MAGNITUDES

- 1.1 Gross domestic product. Volume chain-linked indices, reference year 2008 = 100. Demand components. Spain and euro area 4*
- 1.2 Gross domestic product. Volume chain-linked indices, reference year 2008 = 100. Demand components. Spain: breakdown 5*
- 1.3 Gross domestic product. Volume chain-linked indices, reference year 2008 = 100. Branches of activity. Spain 6*
- 1.4 Gross domestic product. Implicit deflators. Spain 7*

INTERNATIONAL ECONOMY

- 2.1 International comparison. Gross domestic product at constant prices 8*
- 2.2 International comparison. Unemployment rates 9*
- 2.3 International comparison. Consumer prices 10*
- 2.4 Bilateral exchange rates and nominal and real effective exchange rate indices for the euro, US dollar and Japanese yen 11*
- 2.5 Central bank intervention interest rates and short-term domestic market interest rates 12*
- 2.6 10-year government bond yields on domestic markets 13*
- 2.7 International markets: non-energy commodities price index. Crude oil and gold price 14*

NATIONAL DEMAND AND ACTIVITY

- 3.1 Indicators of private consumption. Spain and euro area 15*
- 3.2 Investment in industry (excluding construction): opinion surveys. Spain 16*
- 3.3 Construction. Indicators of building starts and consumption of cement. Spain 17*
- 3.4 Industrial production index. Spain and euro area 18*
- 3.5 Monthly business survey: industry and construction. Spain and euro area (NACE 2009) 19*
- 3.6 Business survey: capacity utilisation. Spain and euro area (NACE 2009) 20*
- 3.7 Tourism and transport statistics. Spain 21*

LABOUR MARKET

- 4.1 Labour force. Spain 22*
- 4.2 Employment and wage-earners. Spain and euro area 23*
- 4.3 Employment by branch of activity. Spain 24*
- 4.4 Wage-earners by type of contract and unemployment by duration. Spain 25*
- 4.5 Registered unemployment by branch of activity. Contracts and placements. Spain 26*
- 4.6 Collective bargaining agreements. Spain 27*
- 4.7 Quarterly labour costs survey. Spain 28*
- 4.8 Unit labour costs. Spain and euro area 29*

PRICES	5.1 Consumer price index. Spain (2011 = 100) 30*
	5.2 Harmonised index of consumer prices. Spain and euro area (2005 = 100) 31*
	5.3 Producer price index. Spain and euro area (2010=100) 32*
	5.4 Unit value indices for Spanish foreign trade 33*
GENERAL GOVERNMENT	6.1 General Government. Net lending (+) or net borrowing (-) according to the Excessive Deficit Procedure (EDP) 34*
	6.2 General Government. Debt according to the Excessive Deficit Procedure (EDP) 35*
	6.3 State resources and uses according to the National Accounts 36*
	6.4 State financial transactions ¹ 37*
	6.5 State financial transactions. Spain ¹ 38*
	6.6 Regional (autonomous) governments. Net lending (+) or net borrowing (-) according to the Excessive Deficit Procedure (EDP) 39*
BALANCE OF PAYMENTS, FOREIGN TRADE AND INTERNATIONAL INVESTMENT POSITION	7.1 Spanish balance of payments vis-à-vis other euro area residents and the rest of the world. Current account ¹ (BE) 40*
	7.2 Spanish balance of payments vis-à-vis other euro area residents and the rest of the world. Financial account (BE) 41*
	7.3 Spanish foreign trade with other euro area countries and with the rest of the world. Exports and dispatches 42*
	7.4 Spanish foreign trade with other euro area countries and with the rest of the world. Imports and arrivals 43*
	7.5 Spanish foreign trade with other euro area countries and with the rest of the world. Trade balance: geographical distribution 44*
	7.6 Spanish international investment position vis-à-vis other euro area residents and the rest of the world. Summary ¹ (BE) 45*
	7.7 Spanish international investment position vis-à-vis other euro area residents and the rest of the world. Breakdown by investment ¹ (BE) 46*
	7.8 Spanish reserve assets ¹ (BE) 47*
	7.9 Spanish external debt vis-à-vis other euro area residents and the rest of the world. Summary ¹ (BE) 48*
FINANCIAL VARIABLES	8.1 Consolidated balance sheet of the Eurosystem, and balance sheet of the Banco de España. Net lending to credit institutions and its counterparts (BE) 49*
	8.2 Cash and cash equivalents, other liabilities of credit institutions and mutual funds shares of non-financial corporations, households and NPISHs resident in Spain (BE) 50*
	8.3 Cash and cash equivalents, other liabilities of credit institutions and mutual funds shares of non-financial corporations resident in Spain (BE) 51*
	8.4 Cash and cash equivalents, other liabilities of credit institutions and mutual funds shares of households and NPISHs resident in Spain (BE) 52*
	8.5 Financing of non-financial sectors resident in Spain (BE) 53*
	8.6 Financing of non-financial corporations resident in Spain (BE) 54*
	8.7 Financing of households and NPISHs resident in Spain (BE) 55*
	8.8 Gross financing of Spain's general government (BE) 56*
	8.9 Lending by credit institutions and credit financial intermediaries to other resident sectors. Breakdown by end-use 57*

¹ IMF Special Data Dissemination Standard (SDDS).

	8.10	Profit and loss account of deposit-taking institutions resident in Spain (BE) 58*
	8.11	Mutual funds resident in Spain 59*
	8.12	Share price indices and turnover on securities markets. Spain and euro area 60*
INTEREST RATES AND INDICES OF SPANISH COMPETITIVENESS	9.1	Interest rates. Eurosystem and money market. Euro area and Spain (BE) 61*
	9.2	Interest rates: Spanish short-term and long-term securities markets ¹ (BE) 62*
	9.3	Interest rates on new business. Credit institutions and credit financial intermediaries (CBE 4/2002) ¹ (BE) 63*
	9.4	Indices of Spanish competitiveness vis-à-vis the EU-28 and the euro area 64*
	9.5	Indices of Spanish competitiveness vis-à-vis the developed countries and industrialised countries 65*

GDP. AND DOMESTIC DEMAND. SPAIN AND EURO AREA
Annual percentage changes

DEMAND COMPONENTS. SPAIN AND EURO AREA
Annual percentage changes

Sources: INE (Quarterly National Accounts of Spain. Base year 2008) and Eurostat.

a. Spain: prepared in accordance with ESA95, seasonally- and working-day-adjusted series (see Economic bulletin April 2002); Euro area, prepared in accordance with ESA95. b. Final consumption expenditure may take place on the domestic territory or abroad (ESA95, 3.75). It therefore includes residents' consumption abroad, which is subsequently deducted in Imports of goods and services. c. Euro area, private consumption.

d. Euro area, government consumption. e. Residents' demand within and outside the economic territory.

f. Exports and imports comprise goods and services and include cross-border trade within the euro area. g. Billions of euro.

EXCHANGE RATES

INDICES OF THE REAL EFFECTIVE EXCHANGE RATE BASED ON CONSUMER PRICES VIS-A-VIS THE DEVELOPED COUNTRIES

Sources: ECB and BE.

a. Geometric mean calculated using a double weighting system based on (1995-1997),(1998-2000), (2001-2003), (2004-2006) and (2007-2009) manufacturing trade of changes in the

spot price of each currency against the currencies of the other developed countries. A fall in the index denotes a depreciation of the currency against those of the other developed countries.

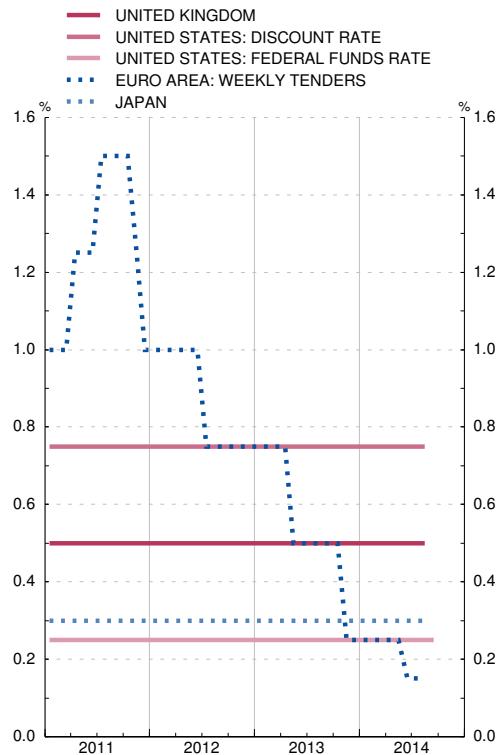

b. Obtained by multiplying the relative prices of each area/country (relation between its price index and the price index of the group) by the nominal effective exchange rate. A decline in the index denotes a depreciation of the real effective exchange rate and, may be interpreted as an improvement in that area/country's competitiveness.

TOURISM
Trend obtained with TRAMO-SEATS

TRANSPORT
Trend obtained with TRAMO-SEATS

Sources: INE and Instituto de Estudios Turísticos, Estadística de Movimientos Turísticos en Frontera.

Note: The underlying series for this indicator are in Tables 23.14 and 23.15 of the BE Boletín estadístico.

a. Information from hotel directories. Since January 2006, the frequency of data collection has been increased to every day of the month. Because hotel directories are updated at different times, data for different years are not directly comparable. Chaining coefficients are available for the periods 2005, June 2009-May 2010 and July 2010-July 2011.

LABOUR FORCE SURVEY
Annual percentage change

LABOUR FORCE
Annual changes

Source: INE (Labour Force Survey: 2005 methodology).

a. Col.7 = (col.5/col.1)x annual change in col.2; Col.8 = (annual change in col.4/100) x col.1(t-4).

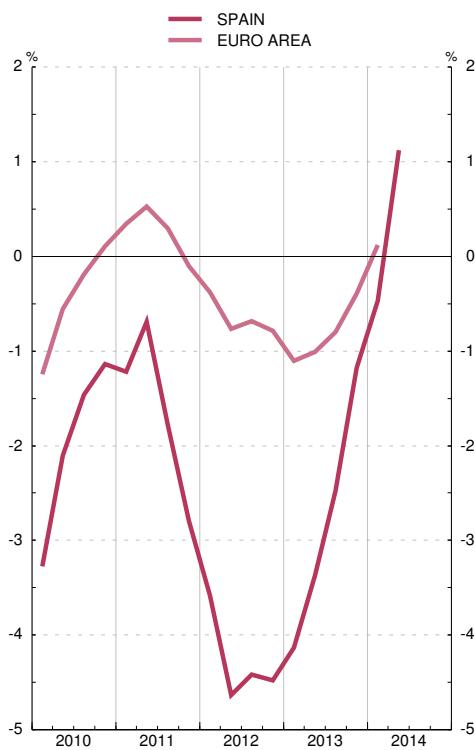

General note to the tables: As a result of the change in the population base (2011 Census), all the series in this table have been revised as from 2002. In addition, since 2005 Q1 the new obligatory variables referred to in Regulation (EC) 2257/2003 (on the adaptation of the list of labour force survey characteristics) have been included, a centralised procedure for telephone interviews has been set in place and the questionnaire has been modified. Thus, in 2005 Q1, there is a break in the series of some variables. For further information, see www.ine.es

LABOUR FORCE: COMPONENTS
Annual percentage changes

Sources: INE (Labour Force Survey: 2005 methodology), and ECB.

General note to the tables: As a result of the change in the population base (2011 Census), all the series in this table have been revised as from 2002. In addition, since 2005 Q1 the new obligatory variables referred to in Regulation (EC) 2257/2003 (on the adaptation of the list of labour force survey characteristics) have been included, a centralised procedure for telephone interviews has been set in place and the questionnaire has been modified. Thus, in 2005 Q1, there is a break in the series of some variables. For further information, see www.ine.es.

HARMONISED INDEX OF CONSUMER PRICES. TOTAL

Annual percentage changes

HARMONISED INDEX OF CONSUMER PRICES. COMPONENTS

Annual percentage changes

Source: Eurostat.

a. Since January 2011 the rules of Commission Regulation (EC) No 330/2009 on the treatment of seasonal products have been incorporated. This has prompted a break in the series. The series constructed with the new methodology are only available from January 2010. The year-on-year rates of change presented here for 2010 are those disseminated by Eurostat, which were constructed using the series prepared with the new methodology for 2010 and using the series prepared with the old methodology for 2009. Thus, these rates give a distorted view since they compare price indices prepared using two different methodologies. The year-on-year rates of change in the HICP in 2010, calculated on a uniform basis using solely the previous methodology and which are consequently consistent, are as follows: Jan:1.1; Feb:0.9; Mar:1.5; Apr:1.6; May:1.8; Jun:1.5; Jul:1.9; Aug:1.8; Sep:2.1; Oct:2.3; Nov:2.2; Dec:2.9. More detailed methodological notes can be consulted on the Eurostat Internet site (www.eurostat.eu.int).

GENERAL GOVERNMENT DEBT ACCORDING TO THE EDP
By sub-sector. Billions of euro

GENERAL GOVERNMENT DEBT ACCORDING TO THE EDP
By instrument. Billions of euro

SOURCE: BE.

Note: The debt figures have been compiled, for the first time, following the new ESA 2010 methodology.

a. The most recent data to have been checked against those of the regional (autonomous) governments and the six largest municipalities correspond to June 2014.

SUMMARY

CURRENT ACCOUNT

Sources: BE. Data compiled in accordance with the IMF Balance of Payments Manual (5th edition).

a. A positive sign for the current and capital account balances indicates a surplus (receipts greater than payments) and, thus, a Spanish net loan abroad (increase in the creditor position or decrease in the debtor position).

b. A positive sign for the financial account balance (the net change in liabilities exceeds the net change in financial assets) means a net credit inflow, i.e. a net foreign loan to Spain (increase in the debtor position or decrease in the creditor position).

**7.2. SPANISH BALANCE OF PAYMENTS VIS-À-VIS OTHER EURO AREA RESIDENTS AND THE REST OF THE WORLD.
FINANCIAL ACCOUNT (a)**

**FINANCIAL ACCOUNT
(NCL-NCA)**

**FINANCIAL ACCOUNT, EXCLUDING BANCO DE ESPAÑA. Breakdown.
(NCL-NCA)**

Sources: BE. Data compiled in accordance with the IMF Balance of Payments Manual (5th edition).

a. Changes in assets (NCA) and changes in liabilities (NCL) are both net of repayments. A positive (negative) sign in NCA columns indicates an outflow (inflow) of foreign financing. A positive (negative) sign in NCL columns implies an inflow (outflow) of foreign financing.

b. This does not include direct investment in quoted shares, but does include portfolio investment in unquoted shares.

c. This includes direct investment in quoted shares, but does not include portfolio investment in unquoted shares. d. Mainly, loans, deposits and repos.

e. A positive (negative) sign indicates a decrease (increase) in the reserves and/or claims of the BE with the Eurosystem.

7.3. SPANISH FOREIGN TRADE WITH OTHER EURO AREA COUNTRIES AND WITH THE REST OF THE WORLD EXPORTS AND DISPATCHES

INTERNATIONAL INVESTMENT POSITION

COMPONENTS OF THE POSITION

Source: BE.

Note: As from December 2002, portfolio investment data have been calculated using a new information system (see Banco de España Circular 2/2001 and note on changes introduced in the economic indicators). The incorporation of the new data under the heading 'shares and mutual funds' of other resident sectors entails a very significant break in the time series, both in the financial assets and the liabilities, so that the series have been revised back to 1992. This methodological change introduced by the new system also affects the rest of the headings, to some extent, but the effect does not justify a complete revision of the series.

a. See note b to table 17.21 of the Boletín Estadístico.

RESERVE ASSETS
END-OF-YEAR POSITIONS

RESERVE ASSETS
END-OF-MONTH POSITIONS

Source: BE.

Note: From January 1999 the assets denominated in euro and other currencies vis-à-vis residents of other euro area countries are not considered reserve assets. To December 1998, data in pesetas have been converted to euro using the irrevocable euro conversion rate. Since January 1999, all reserve assets are valued at market prices. As of January 2000 reserve assets data have been compiled in accordance with the IMF's new methodological guidelines published in the document 'International Reserves and Foreign Currency Liquidity'.

Guidelines for a Data Template', October 2001 (<http://dsbb.imf.org/Applications/web/sddsguide>). Using this new definition, total reserve assets as at 31.12.99 would have been EUR 37835 million instead of the amount of EUR 37288 million published in this table.

a. The annual percentage changes are calculated as the effective flow of the period / the stock at the beginning of the period.

b. Includes issues of resident financial subsidiaries of non-financial corporations, insofar as the funds raised in these issues are routed to the parent company as loans. The issuing institutions of these financial instruments are classified as Other financial intermediaries in the Boletín Estadístico and in the Financial Accounts of the Spanish Economy.

c. Including loans transferred to SAREB, which is an Asset Management Corporation (AMC).

SOURCE: BE.

a. See chapters 4.13, 4.18 y 4.23 of the Boletín Estadístico and their notes which are published at www.bde.es and the notes of changes.

b. Includes loans and credit to households for the purchase of land and rural property, the purchase of securities, the purchase of current goods and services not considered to be consumer durables (e.g. loans to finance travel expenses) and for various end-uses not included in the foregoing.

c. Asset-backed securities brought back onto the balance sheet as a result of the entry into force of Banco de España Circular BE 4/2004 have caused a break in the series in June 2005. The rates depicted in the chart have been adjusted to eliminate this effect.

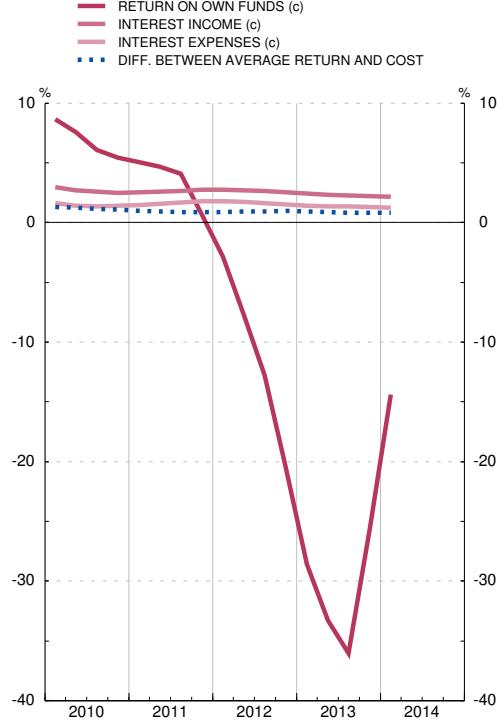

d. Including: construction, real estate activities and home purchases and improvements

8.10. PROFIT AND LOSS ACCOUNT OF DEPOSIT-TAKING INSTITUTIONS RESIDENT IN SPAIN

LOANS
SYNTHETIC RATES

DEPOSITS
SYNTHETIC RATES

Source: BE.

a. This table is included among the IMF's requirements to meet the Special Data Dissemination Standards (SDDS)

b. APRC: annual percentage rate of charge. NEDR: narrowly defined effective rate, which is the same as the APRC without including commissions.

c. Calculated by adding to the NDER rate, which does not include commissions and other expenses, a moving average of such expenses.

d. The synthetic rates of loans and deposits are obtained as the average of the interest rates on new business weighted by the euro-denominated stocks included in the balance sheet for all the instruments of each sector.

e. Up to the reference month May 2010, this column includes credit granted through credit cards (see the 'Changes' note in the July-August 2010 Boletín Estadístico).

INDICES OF SPANISH COMPETITIVENESS VIS À VIS THE EU-28

INDICES OF SPANISH COMPETITIVENESS VIS À VIS THE EURO AREA

Source: BE.

a. Outcome of multiplying nominal and cost/price components. A decline in the index denotes an improvement in the competitiveness of Spanish products.

b. Geometric mean calculated using a double weighting system based on (1995-1997), (1998-2000), (2001-2003), (2004-2006) and (2007-2009) manufacturing foreign trade figures.

c. Relationship between the price indices of Spain and of the group.

d. Quarterly series. Indices for Spain have been calculated using data for Unit Labour Costs (total and manufacturing) compiled from Quarterly Spanish National Accounts. Base 2008. Source INE.
