EXCHANGE RATES

INDICES OF THE REAL EFFECTIVE EXCHANGE RATE BASED ON CONSUMER PRICES VIS-A-VIS THE DEVELOPED COUNTRIES

Sources: ECB and BE.

a. Geometric mean calculated using a double weighting system based on (1995-1997),(1998-2000), (2001-2003), (2004-2006) and (2007-2009) manufacturing trade of changes in the

spot price of each currency against the currencies of the other developed countries. A fall in the index denotes a depreciation of the currency against those of the other developed countries.

b. Obtained by multiplying the relative prices of each area/country (relation between its price index and the price index of the group) by the nominal effective exchange rate. A decline in the index denotes a depreciation of the real effective exchange rate and, may be interpreted as an improvement in that area/country's competitiveness.

General note to the tables: As a result of the change in the population base (2011 Census), all the series in this table have been revised as from 2002. In addition, since 2005 Q1 the new obligatory variables referred to in Regulation (EC) 2257/2003 (on the adaptation of the list of labour force survey characteristics) have been included, a centralised procedure for telephone interviews has been set in place and the questionnaire has been modified. Thus, in 2005 Q1, there is a break in the series of some variables. For further information, see www.ine.es

a.NACE 2009. The underlying series of this indicator are in Tables 24.4 and 24.6 of the BE Statistical Bulletin.

General note to the tables: As a result of the change in the population base (2011 Census), all the series in this table have been revised as from 2002. In addition, since 2005 Q1 the new obligatory variables referred to in Regulation (EC) 2257/2003 (on the adaptation of the list of labour force survey characteristics) have been included, a centralised procedure for telephone interviews has been set in place and the questionnaire has been modified. Thus, in 2005 Q1, there is a break in the series of some variables. For further information, see www.ine.es.

a. Since January 2011 the rules of Commission Regulation (EC) No 330/2009 on the treatment of seasonal products have been incorporated. This has prompted a break in the series. The series constructed with the new methodology are only available from January 2010. The year-on-year rates of change presented here for 2010 are those disseminated by Eurostat, which were constructed using the series prepared with the new methodology for 2010 and using the series prepared with the old methodology for 2009. Thus, these rates give a distorted view since they compare price indices prepared using two different methodologies. The year-on-year rates of change in the HICP in 2010, calculated on a uniform basis using solely the previous methodology and which are consequently consistent, are as follows: Jan:1.1; Feb:0.9; Mar:1.5; Apr:1.6; May:1.8; Jun:1.5; Jul:1.9; Aug:1.8; Sep:2.1; Oct:2.3; Nov:2.2; Dec:2.9. More detailed methodological notes can be consulted on the Eurostat Internet site (www.eurostat.eu.int).

GENERAL GOVERNMENT DEBT ACCORDING TO THE EDP

By instrument. Billions of euro

SOURCE: BE.

a. The most recent data to have been checked against those of the regional (autonomous) governments and the six largest municipalities correspond to December 2015.

b. Since July 2014, the debt (loans and securities) of the Fund for the Financing of Payments to Suppliers (FFPS) has been included in the debt of the State instead of in Other Central Government Units, owing to the integration of the latter into the State. From January 2015, this indicator incorporates the effect of the creation of the Fund for the Financing of Regional Governments and the Fund for the Financing of Local Governments, which are also included in the State and have assumed the outstanding amounts of FFPP and FLA as at December 2014.

Note: From January 1999 the assets denominated in euro and other currencies vis-à-vis residents of other euro area countries are not considered reserve assets. To December 1998, data in pesetas have been converted to euro using the irrevocable euro conversion rate. Since January 1999, all reserve assets are valued at market prices.

Reserve assets data have been compiled in accordance with the IMF's new methodological guidelines published in the document 'International Reserves and Foreign Currency Liquidity Guidelines for a Data Template', 2013 (<https://www.imf.org/external/np/sta/ir/IRProcessWeb/pdf/guide2013.pdf>)
